EduGears AI Studio · about 40 minutes · 17 steps

Turn your course outline into slides and questions

Instructor: Faisal Iradat
Credits: Dr Shakeel Khoja, Shahid Hussain and Mahwish Ahmed

EduGears reads your course outline and splits it into modules and lessons. Then it makes slides and practice questions for one lesson at a time.

You will need

- Your EduGears email and password
- Your course outline, saved on your computer as a PDF file
- Choose your most important course: the free plan allows only one
- A pen, to tick each step when you finish it

How to use this guide

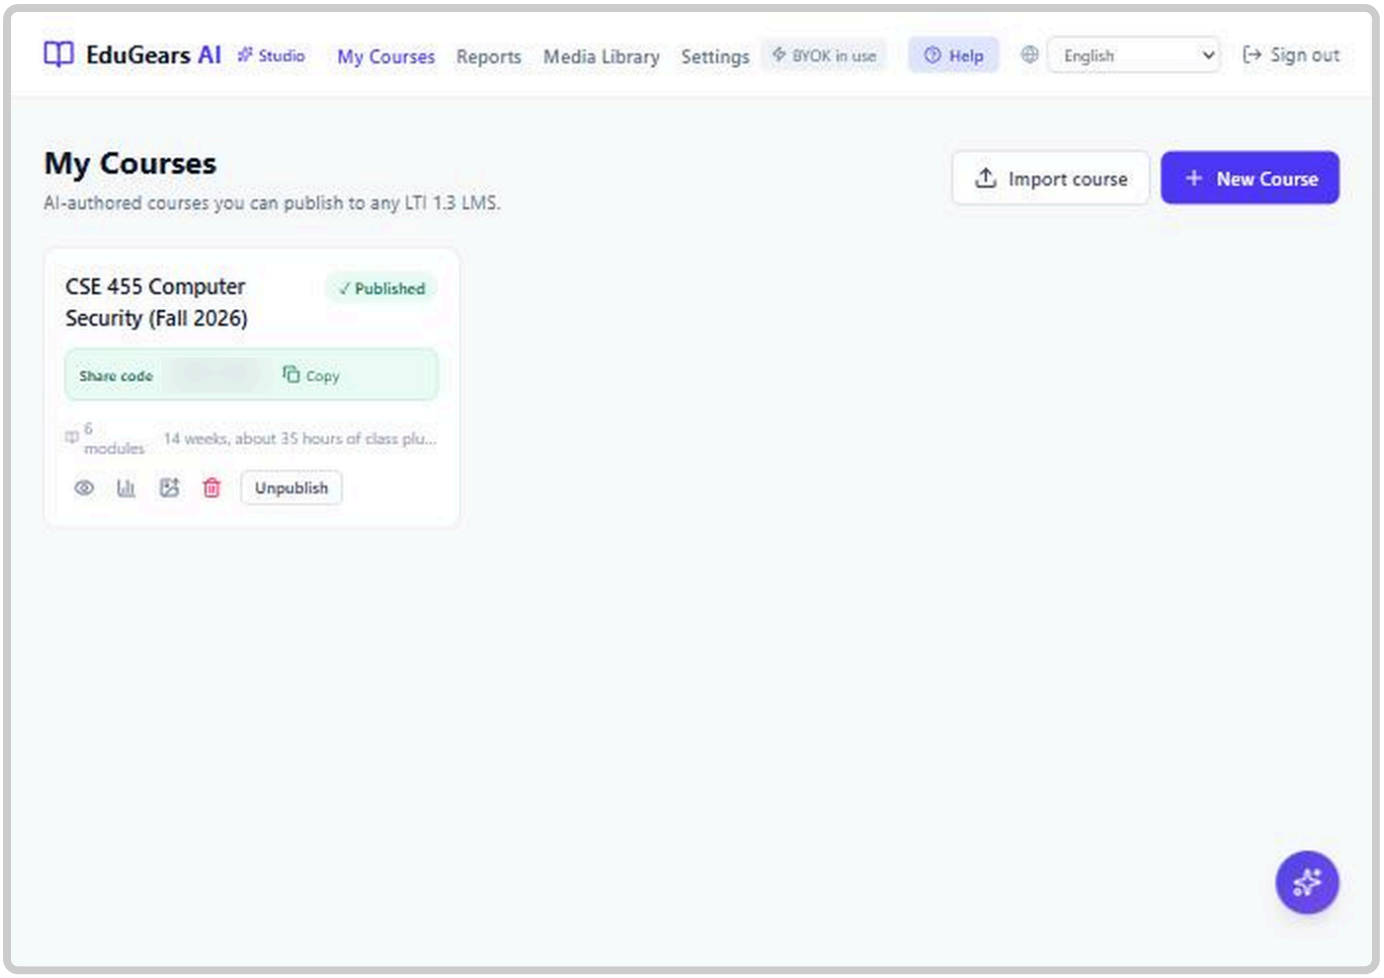

- There is one step on each page. Do what the page says, then turn the page.
- A red box shows where to click:

   Click inside the red box. The red arrow points to it.
- Under the big picture there is often a larger picture of the same place.
- Your screen may look a little different. Look for the same words.
- Take your time. Nothing breaks if you click the wrong thing.

Step 1 of 17

1 Open EduGears

1. Click the long box at the very top of your browser, type **studio.edugears.ai** and press **Enter**.
2. Click **Sign in** and sign in.

When you are signed in, you see “My Courses”. Yours will be empty at first.

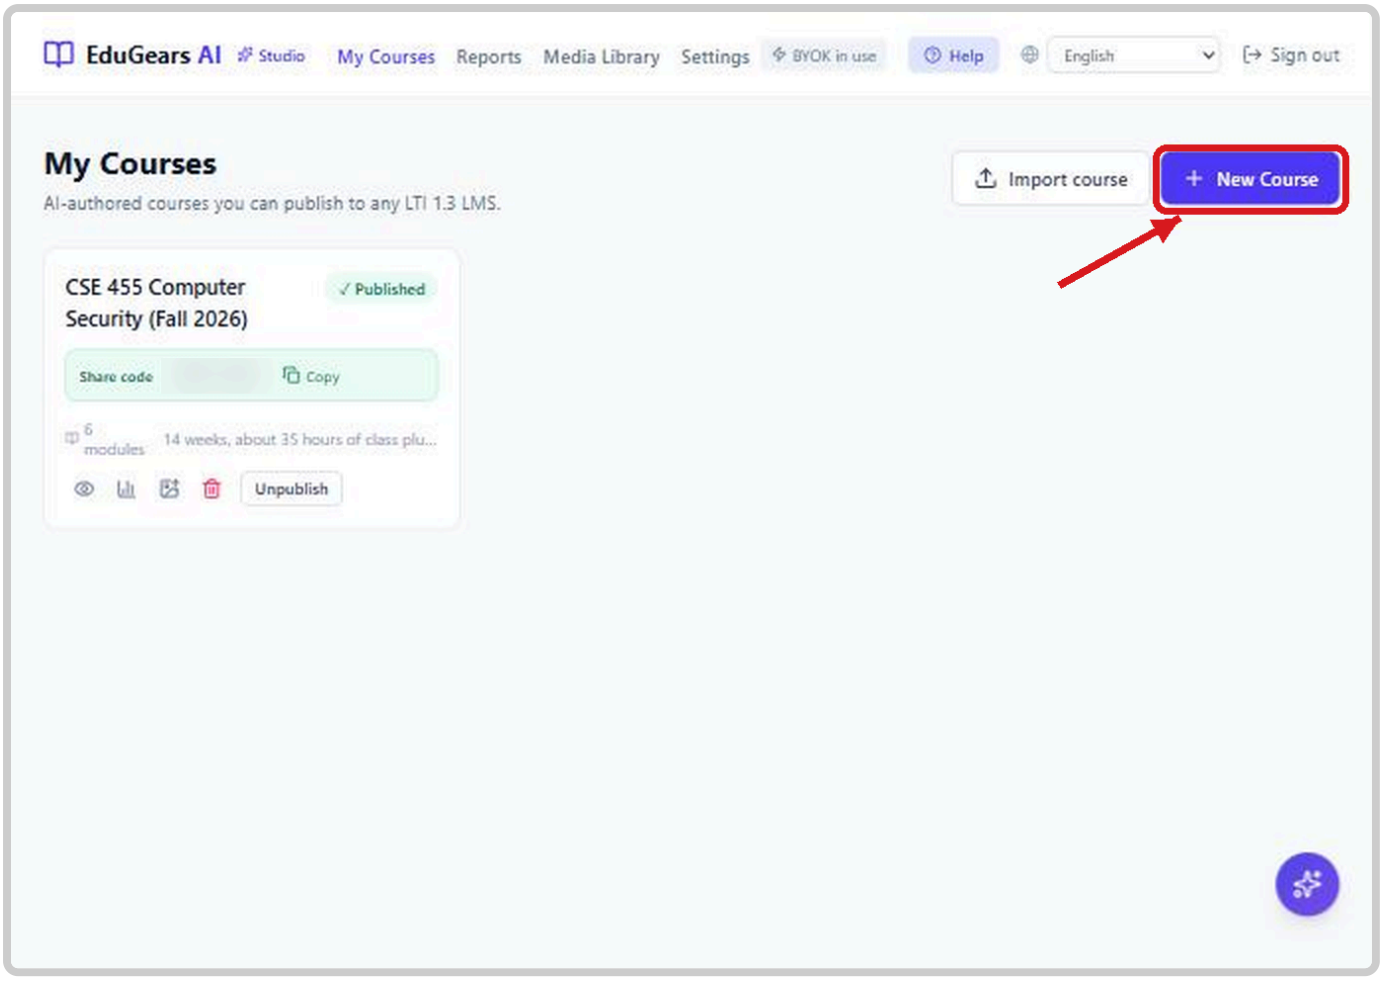

☐ Done? Tick the box and turn the page.

2

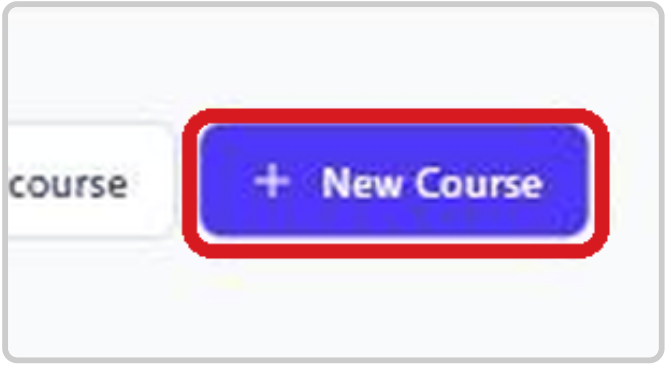

Step 2 of 17

Start a new course

1. Click **New Course**.

Look for this:

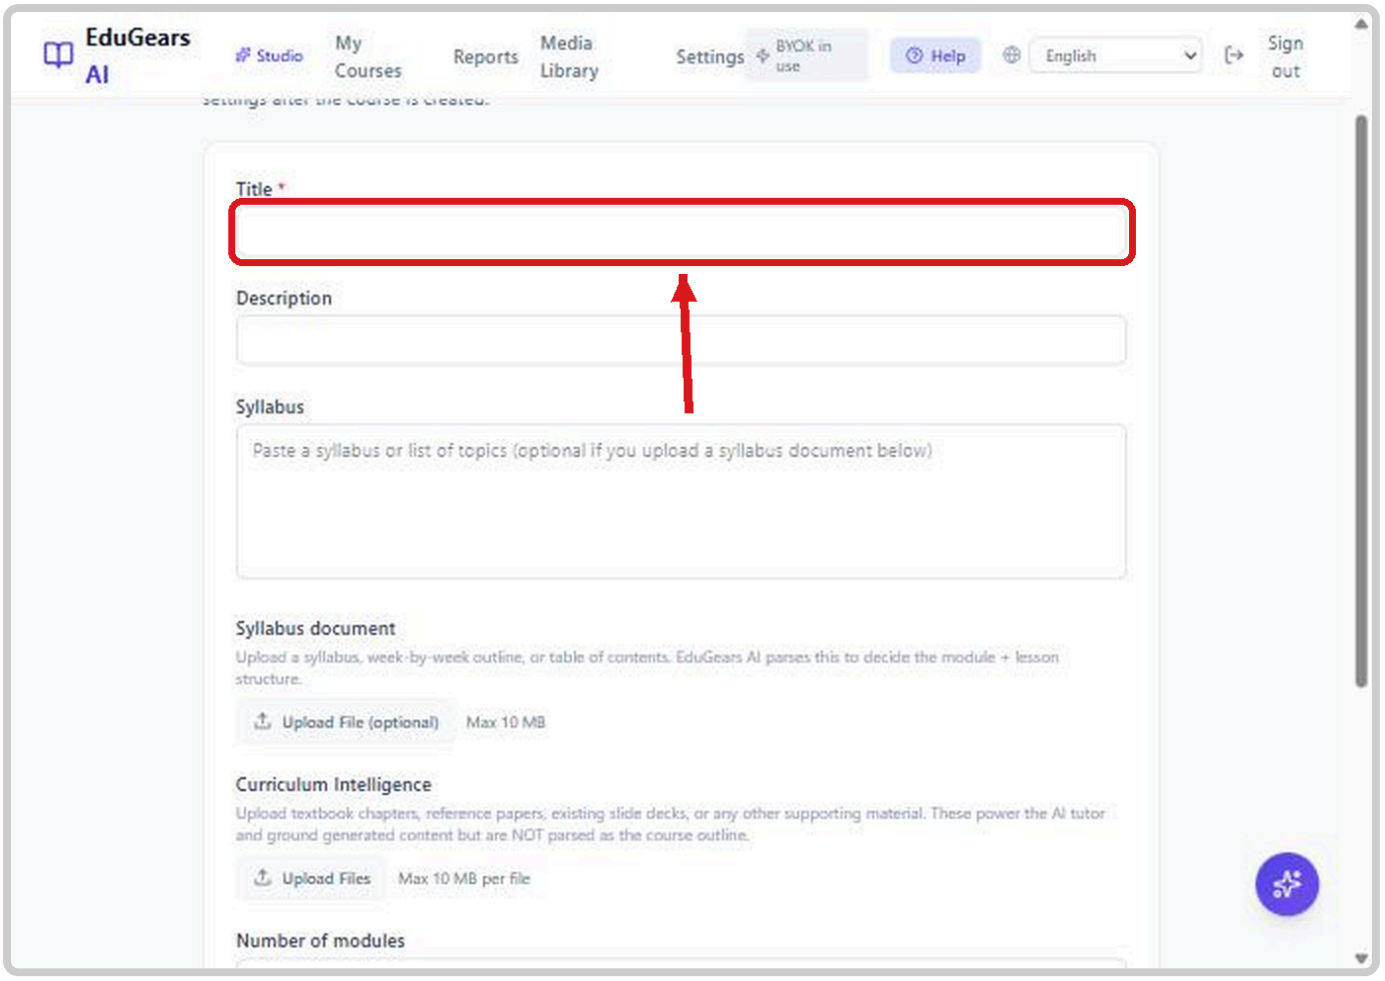

☐ Done? Tick the box and turn the page.

Step 3 of 17

3 Type the course name

1. Click the **Title** box and type your course name.

Look for this:

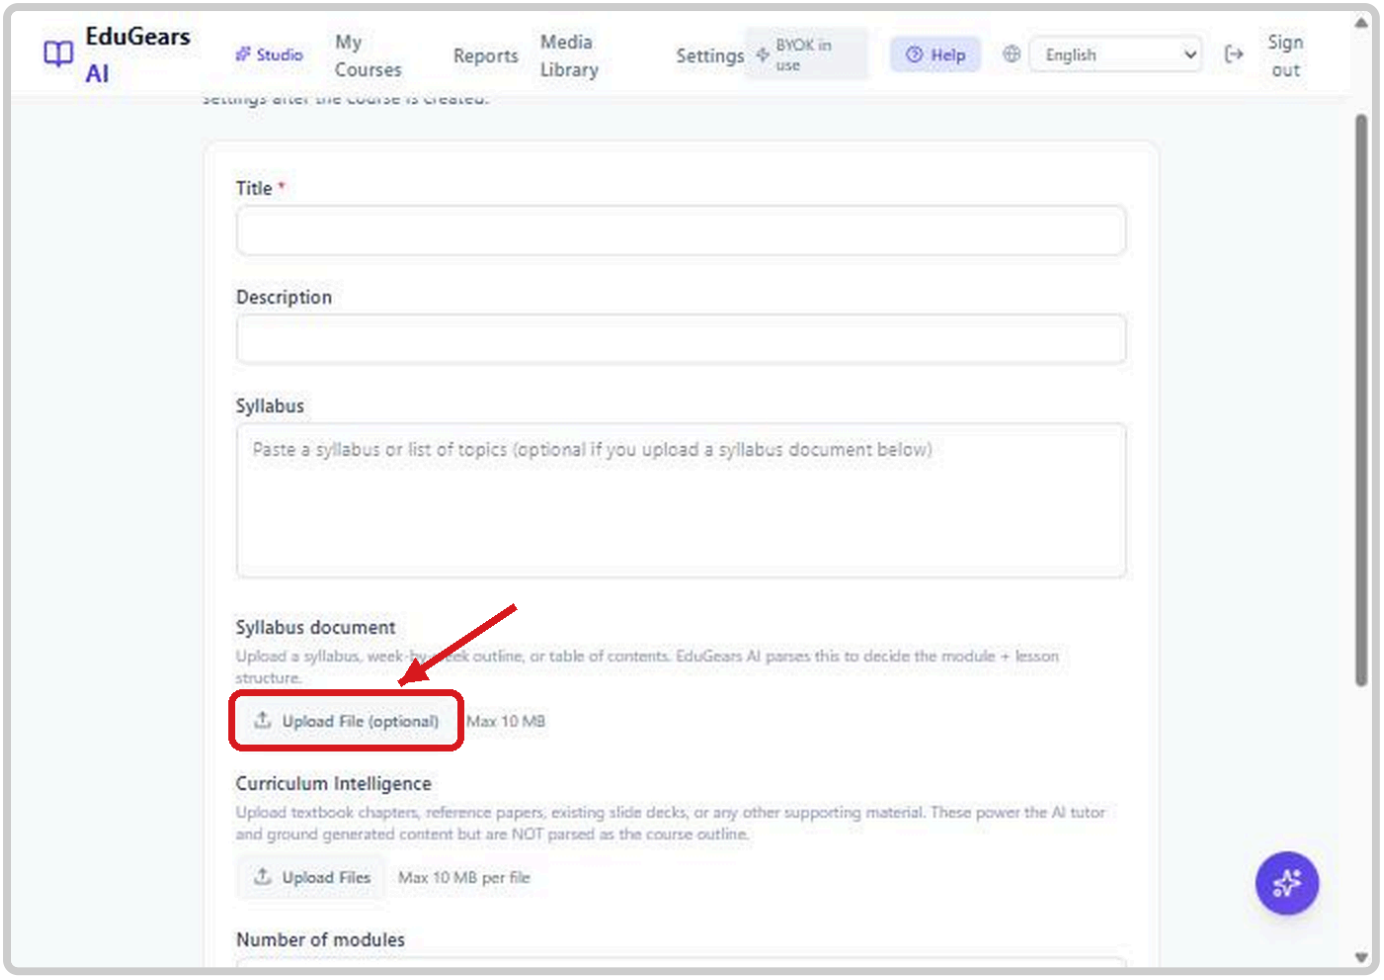

> **Tip:** In the **Syllabus** box you can type how to group the weeks, for example: *Module 1 = Weeks 1 to 3*.

☐ Done? Tick the box and turn the page.

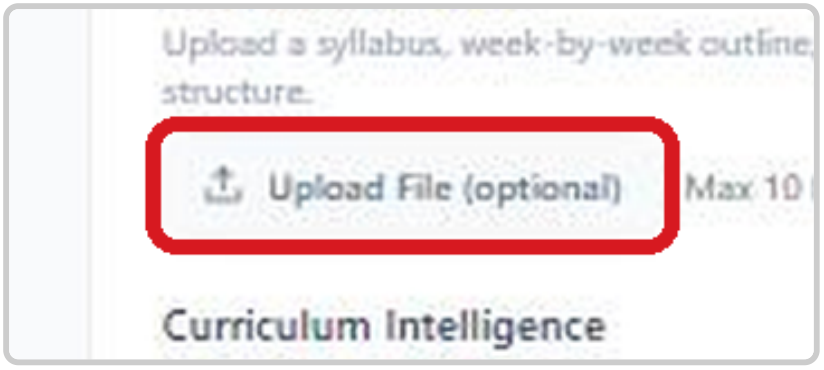

Step 4 of 17

4 Upload your course outline

1. Under **Syllabus document**, click **Upload File**.
2. Find your course outline, click it once, then click **Open**.

Look for this:

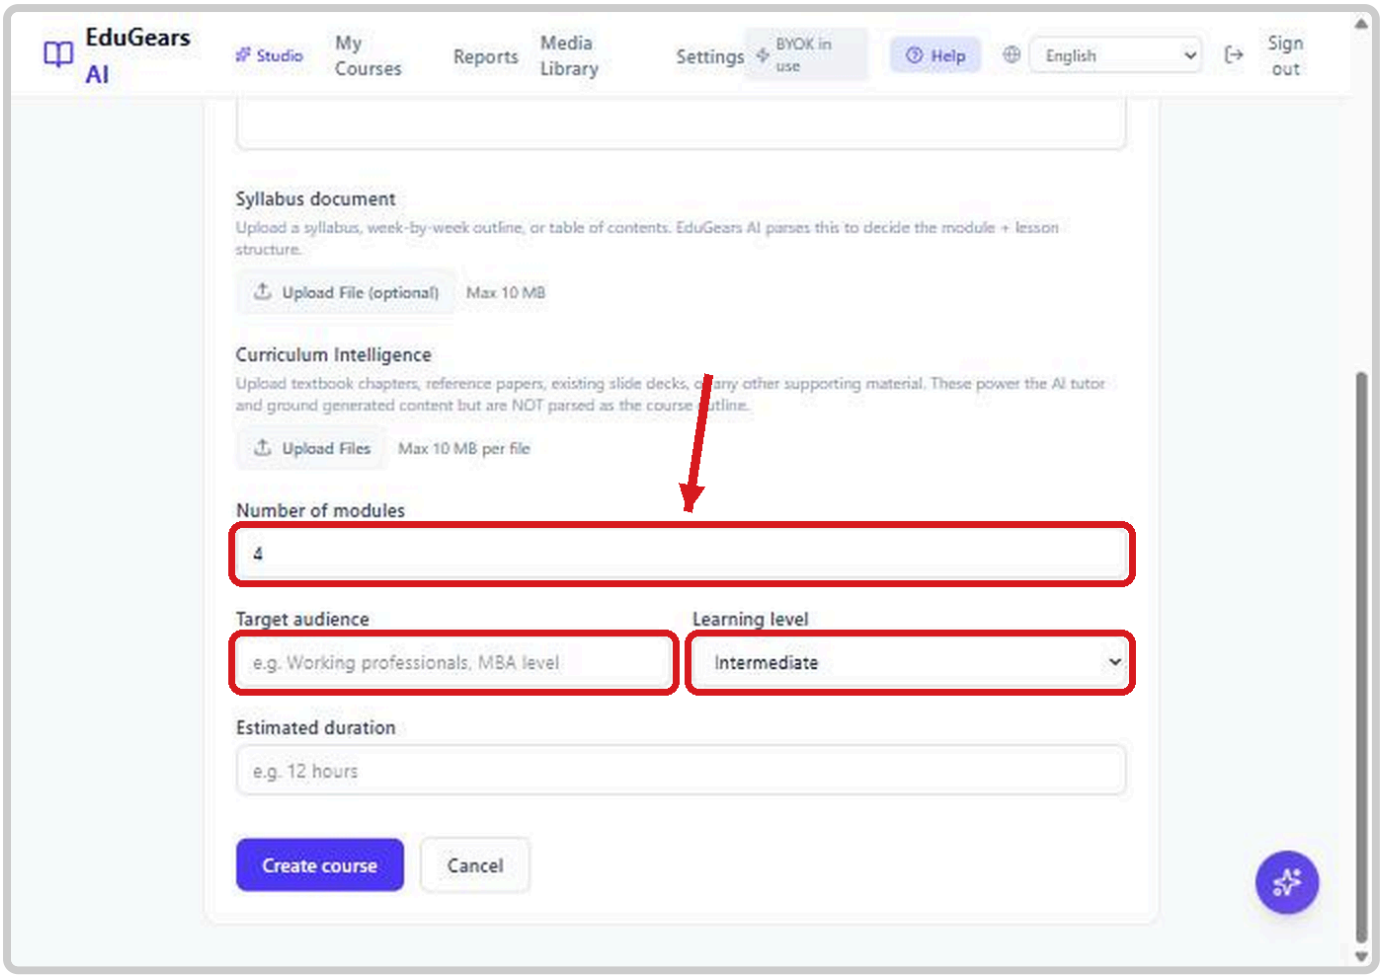

☐ Done? Tick the box and turn the page.

5

Step 5 of 17

Fill in the last boxes

1. Scroll down the page.
2. **Number of modules:** type 6 or fewer.
3. **Target audience:** for example, *BS Computer Science, 3rd year*.
4. **Learning level:** choose Beginner, Intermediate or Advanced.

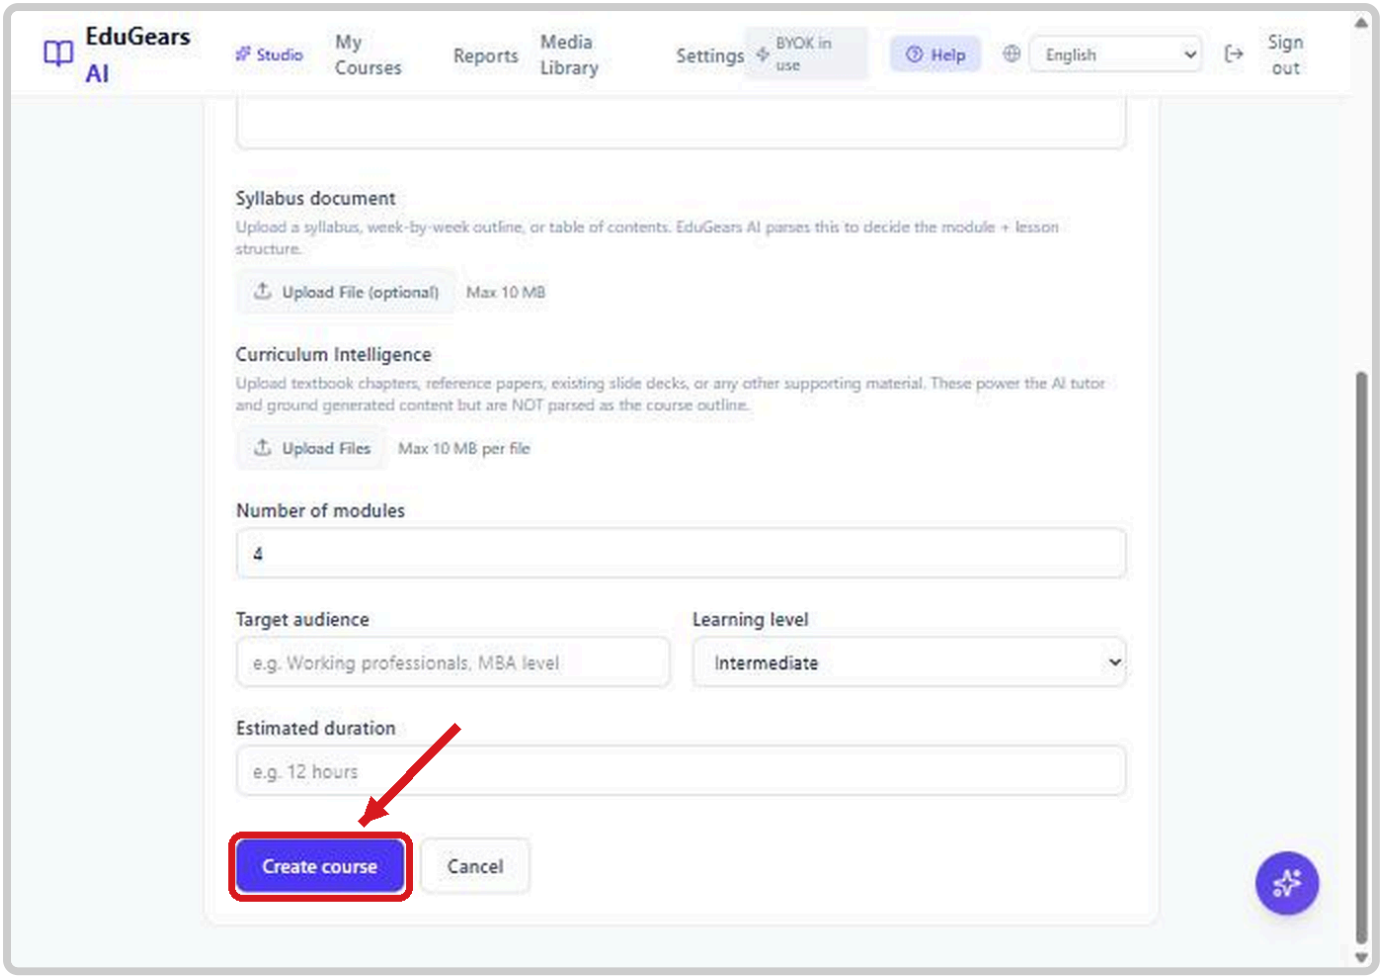

☐ Done? Tick the box and turn the page.

6

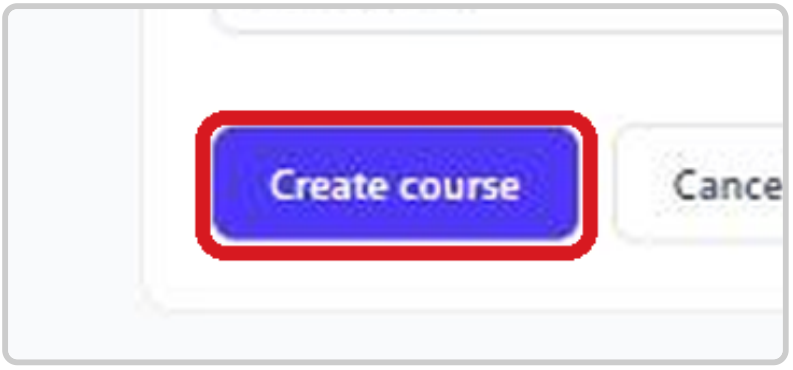

Step 6 of 17

Create the course

1. Click **Create course**.
2. Wait a few minutes while EduGears reads your outline.

Look for this:

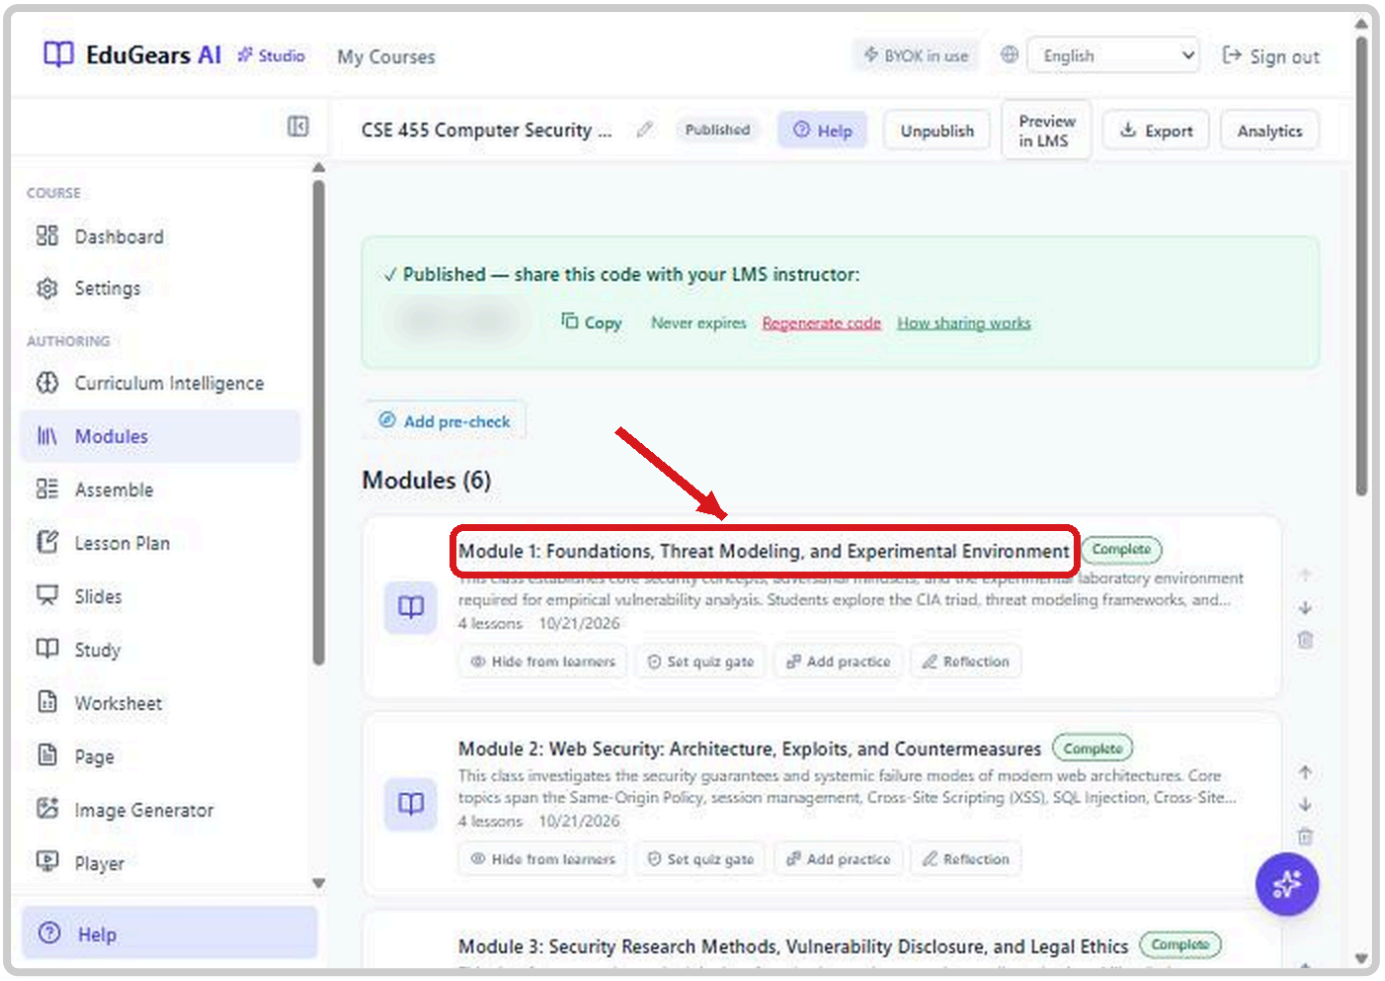

☐ Done? Tick the box and turn the page.

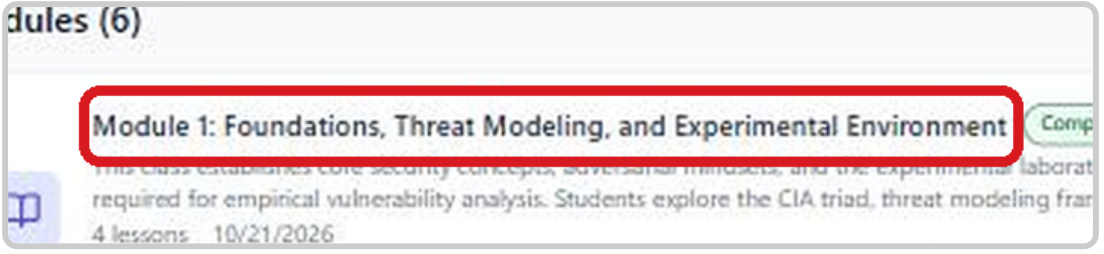

Step 7 of 17

7 Open one module

1. Click the name of the module you want to work on.

Look for this:

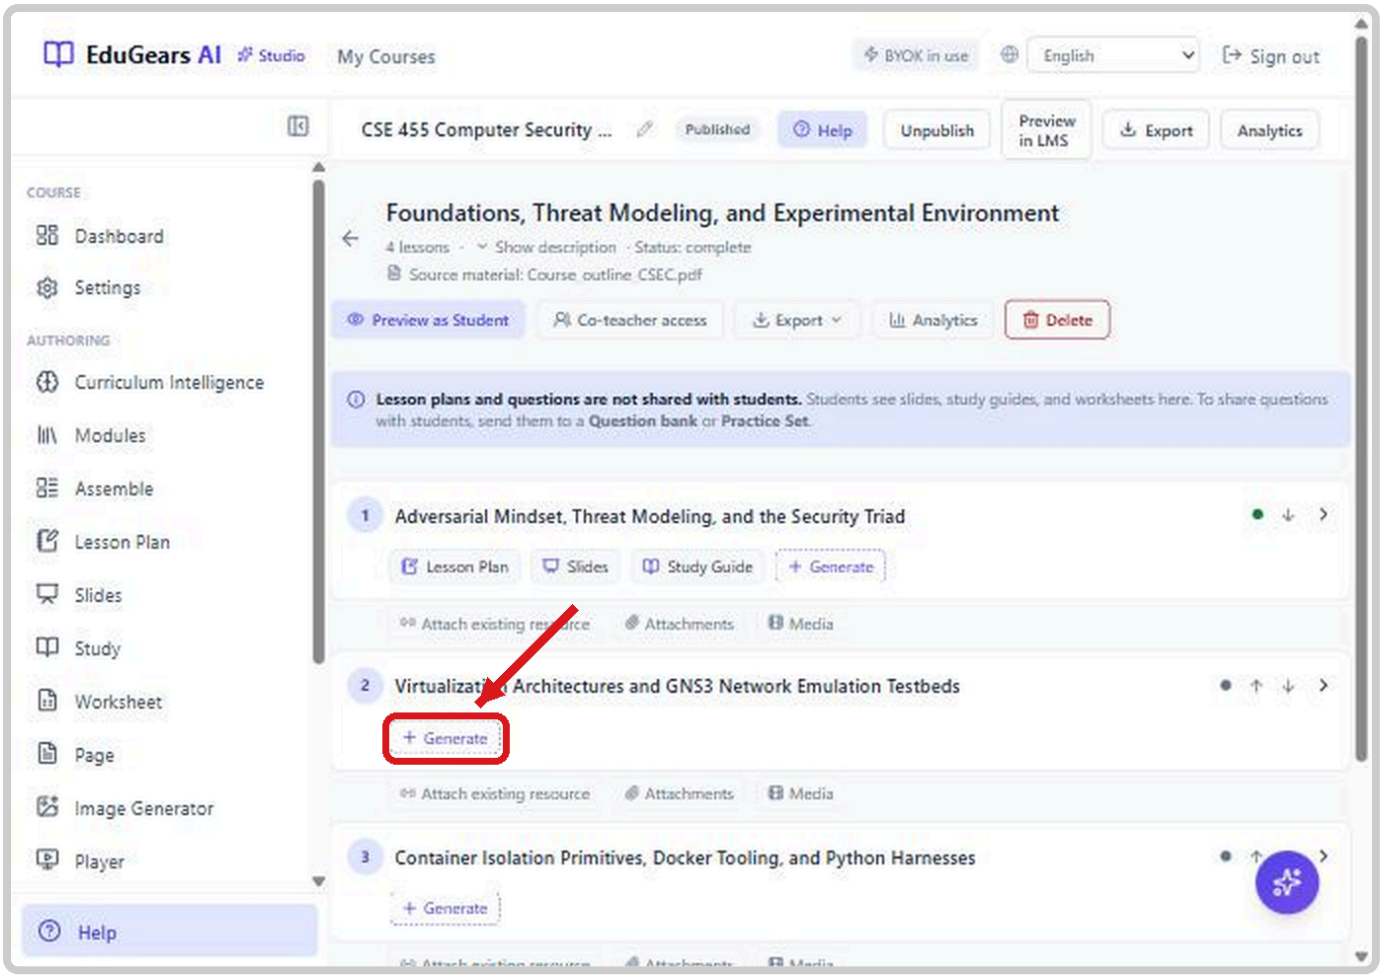

☐ Done? Tick the box and turn the page.

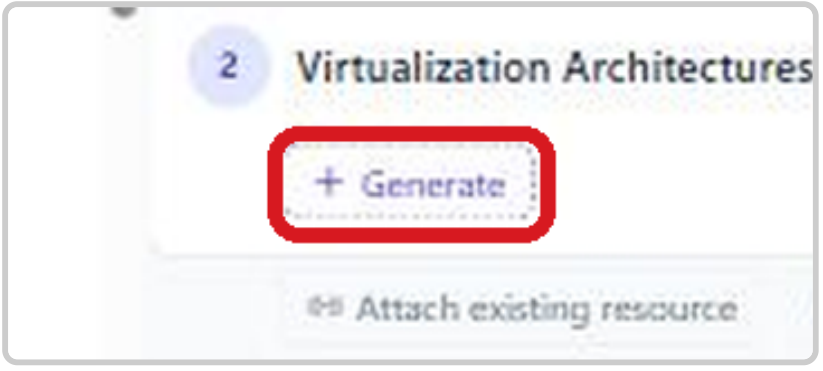

Step 8 of 17

8 Choose a lesson

1. If you want, click a lesson name to rename it to match your week.
2. Next to one lesson, click **+ Generate**.

Look for this:

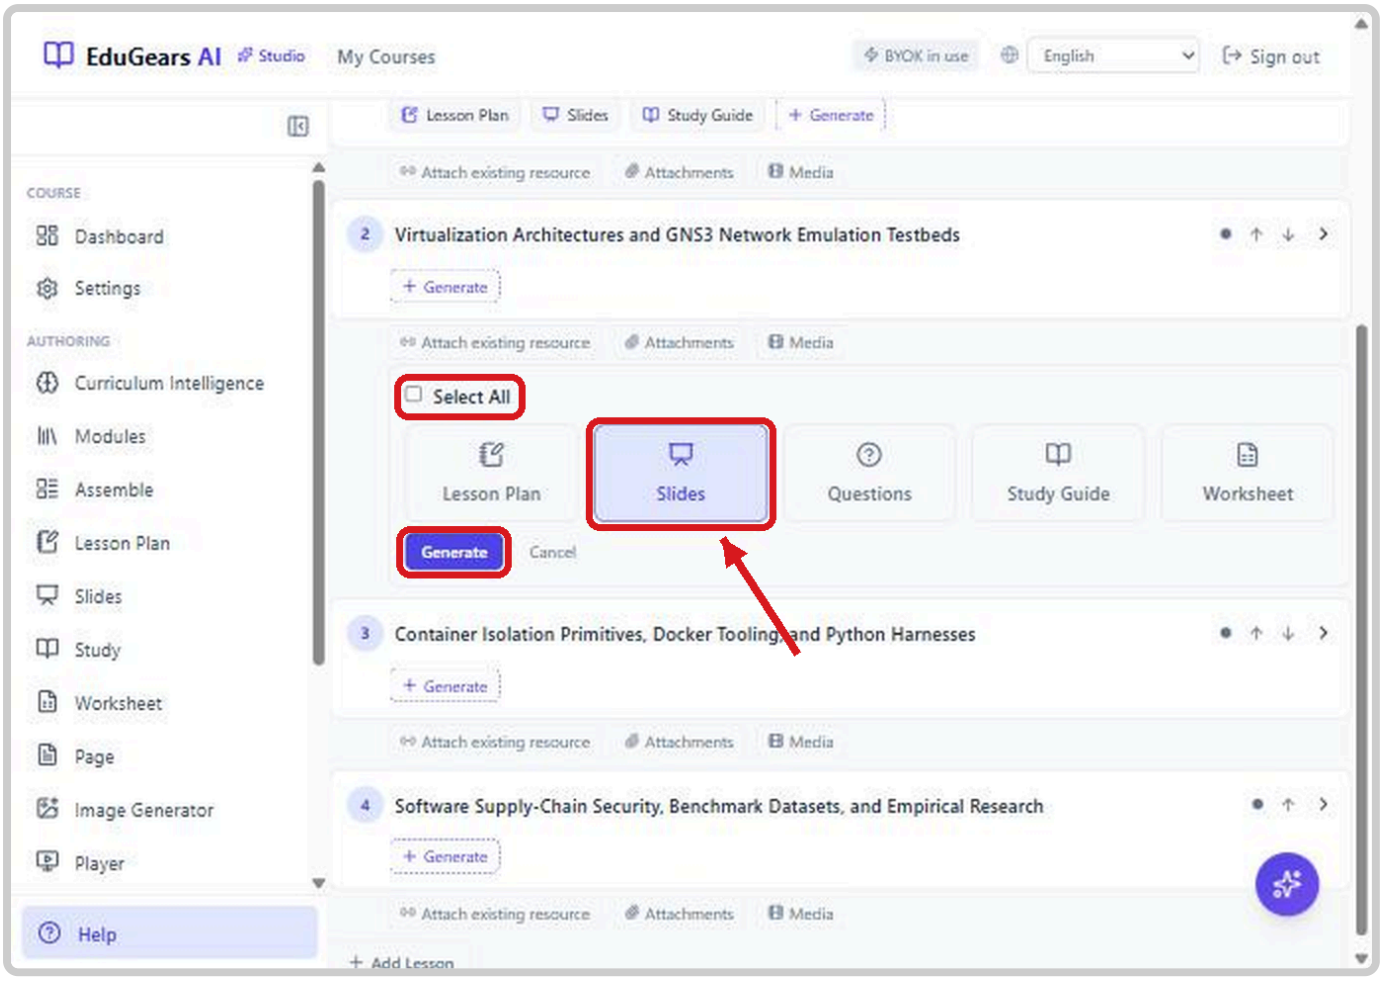

☐ Done? Tick the box and turn the page.

Step 9 of 17

9 Make slides only

1. Click **Select All** so the tick goes away.
2. Click **Slides**.
3. Click **Generate**.

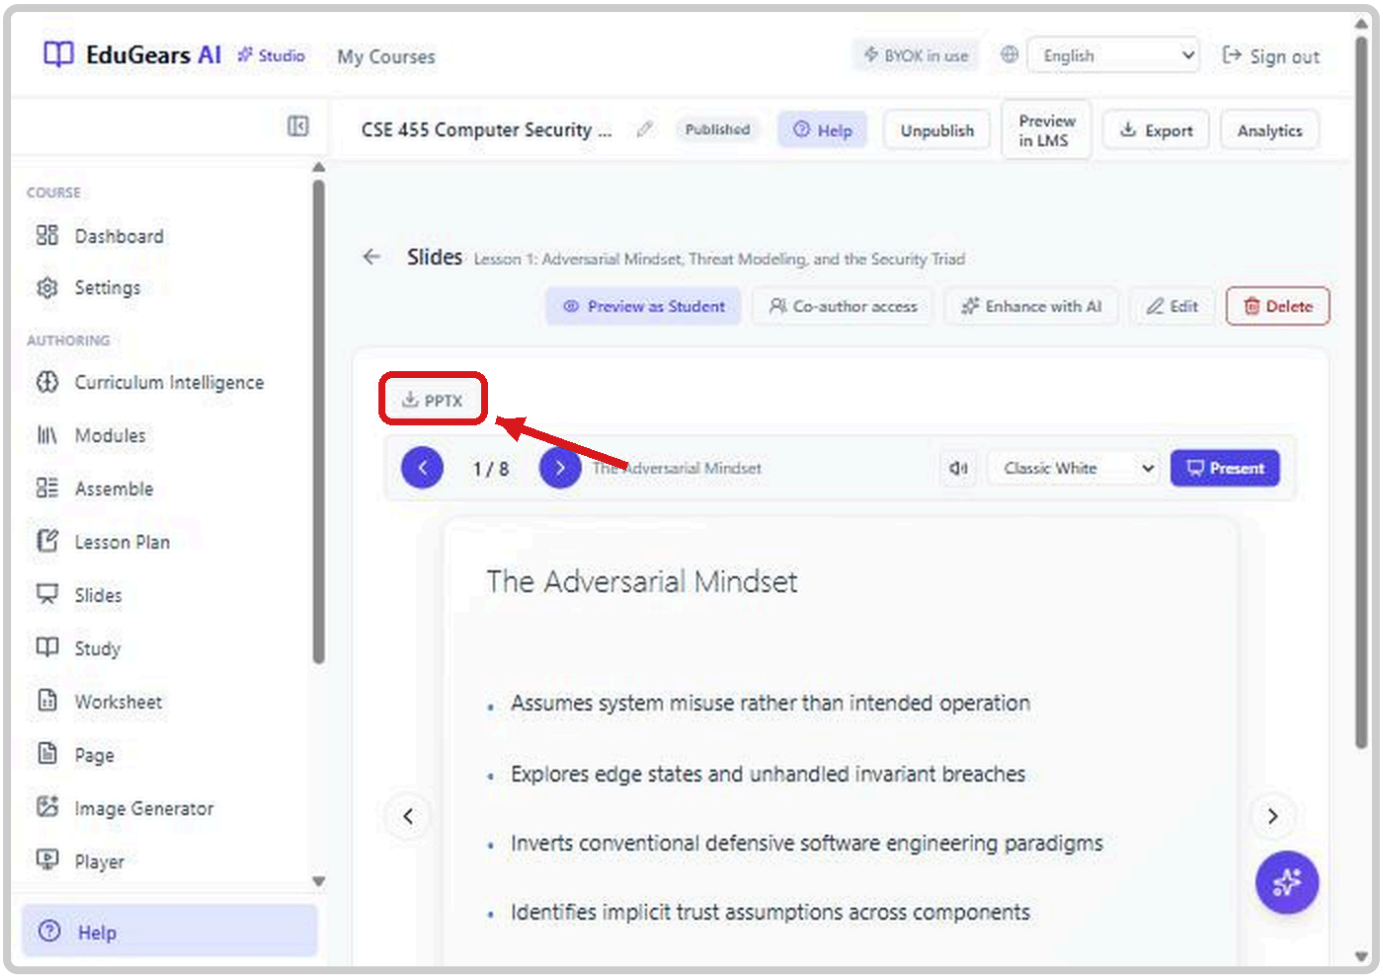

Tip: Making one thing at a time uses fewer credits.

☐ Done? Tick the box and turn the page.

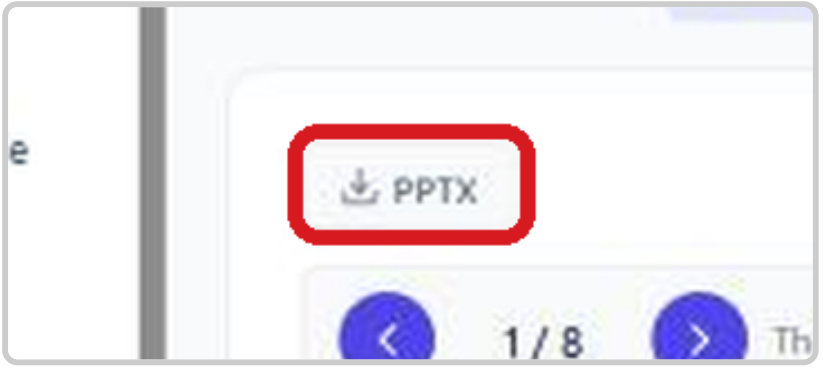

Step 10 of 17

10 Open and download the slides

1. When they are ready, click **Slides** under the lesson name.
2. To use them in Sakai, click **PPTX**. This saves a PowerPoint file.

Look for this:

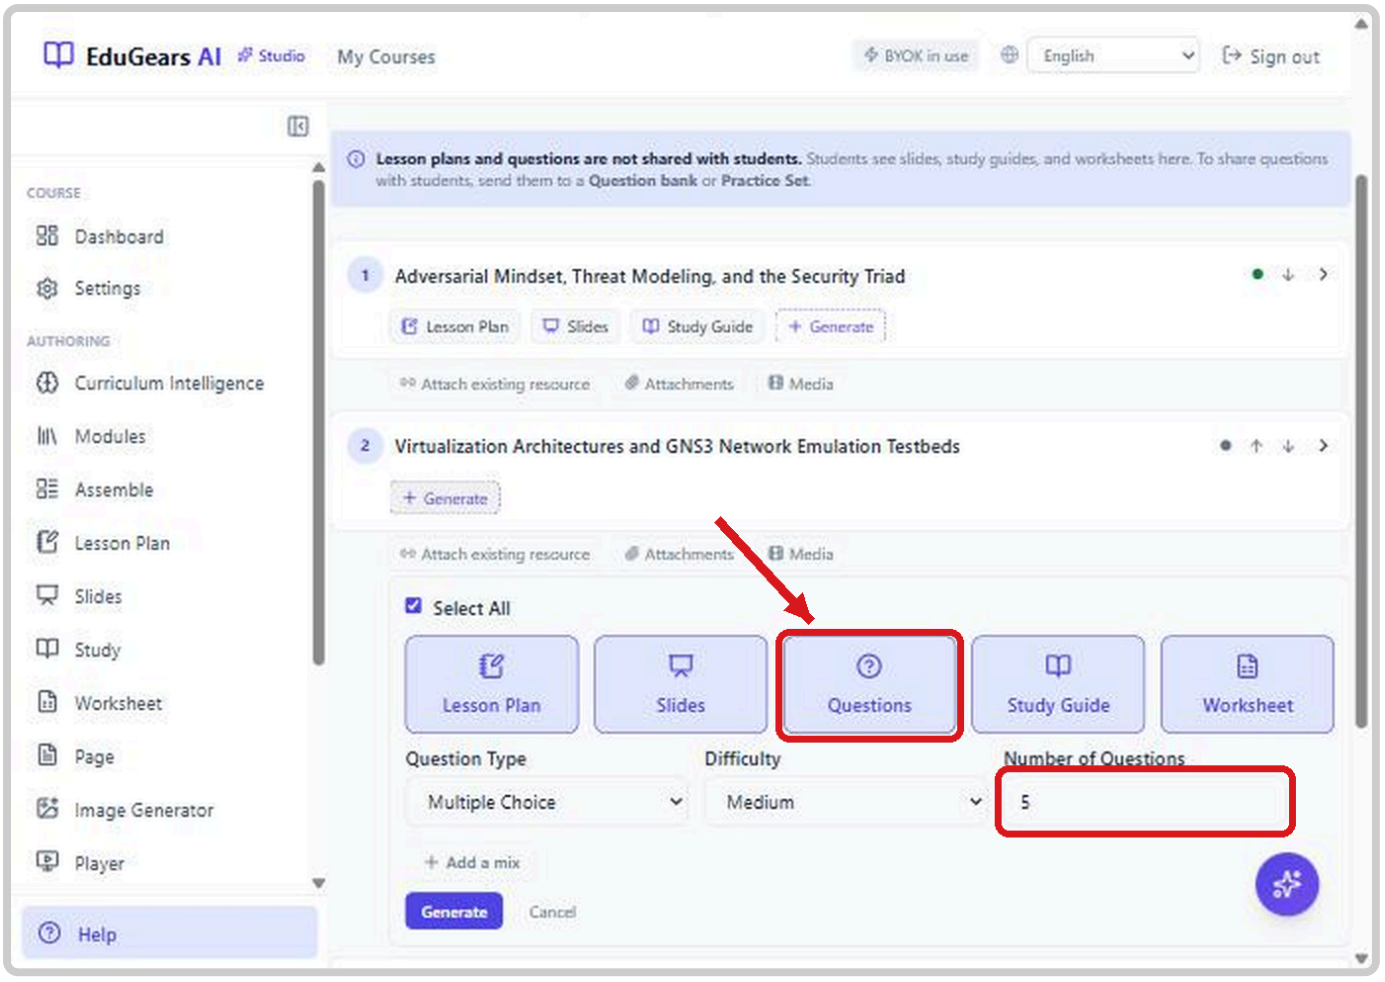

☐ Done? Tick the box and turn the page.

Step 11 of 17

11 Make five questions

1. Click **+ Generate** again and untick **Select All**.
2. Click **Questions**. Set **Number of Questions** to **5**.
3. Click **Generate**.

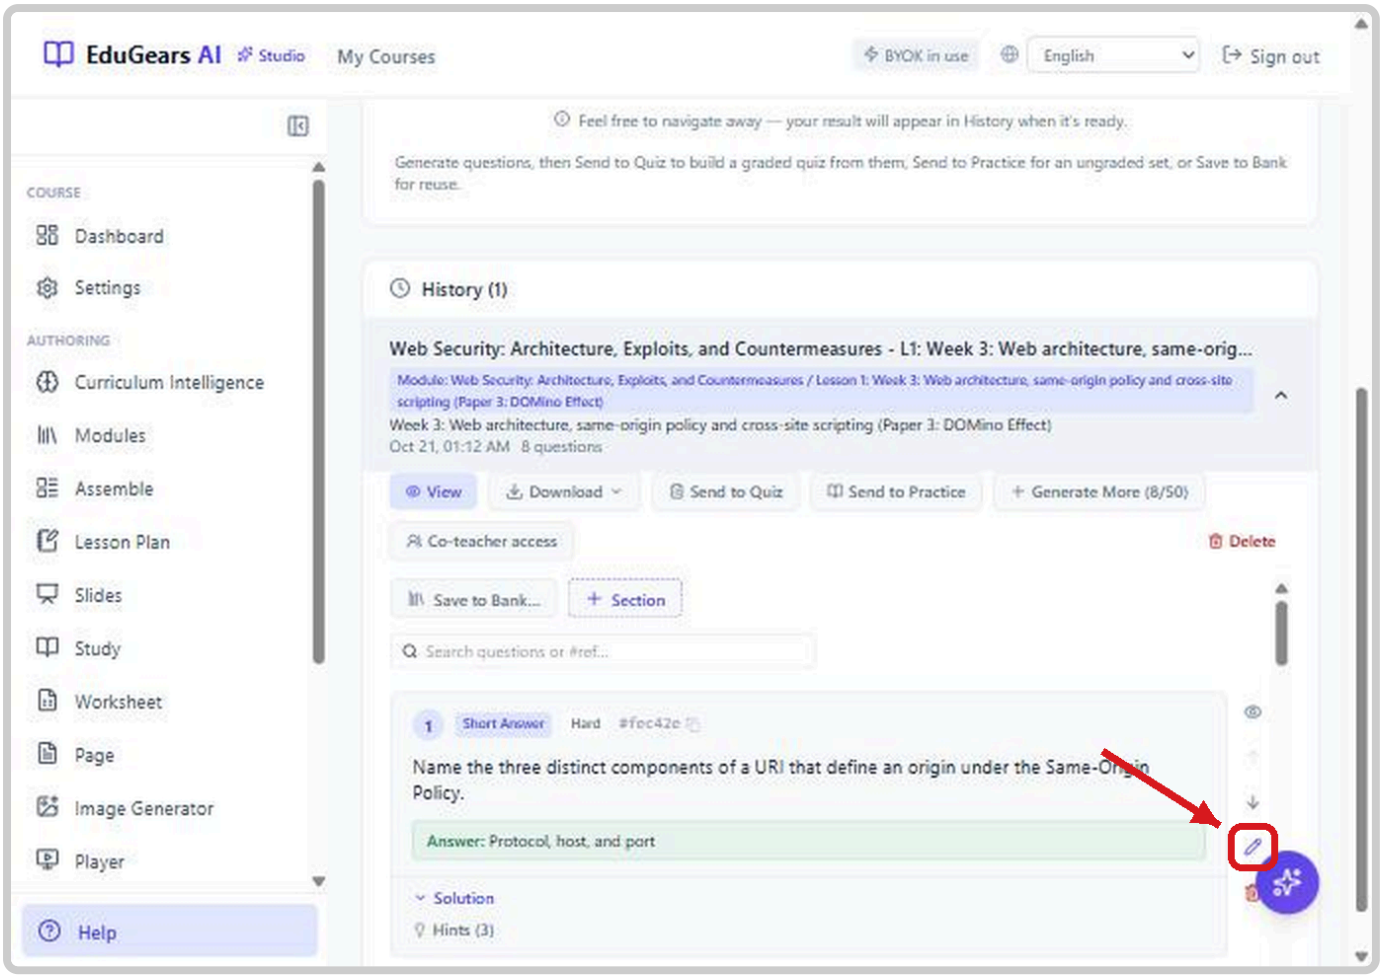

☐ Done? Tick the box and turn the page.

12

Step 12 of 17

Improve one question

1. Open the questions. Click the pencil next to a question.
2. Change it so students must explain **why**, not just remember a fact.

The computer wrote	You change it to
What method does the paper use?	Why did the authors choose this method?
List the limitations.	Which limitation matters most? Why?

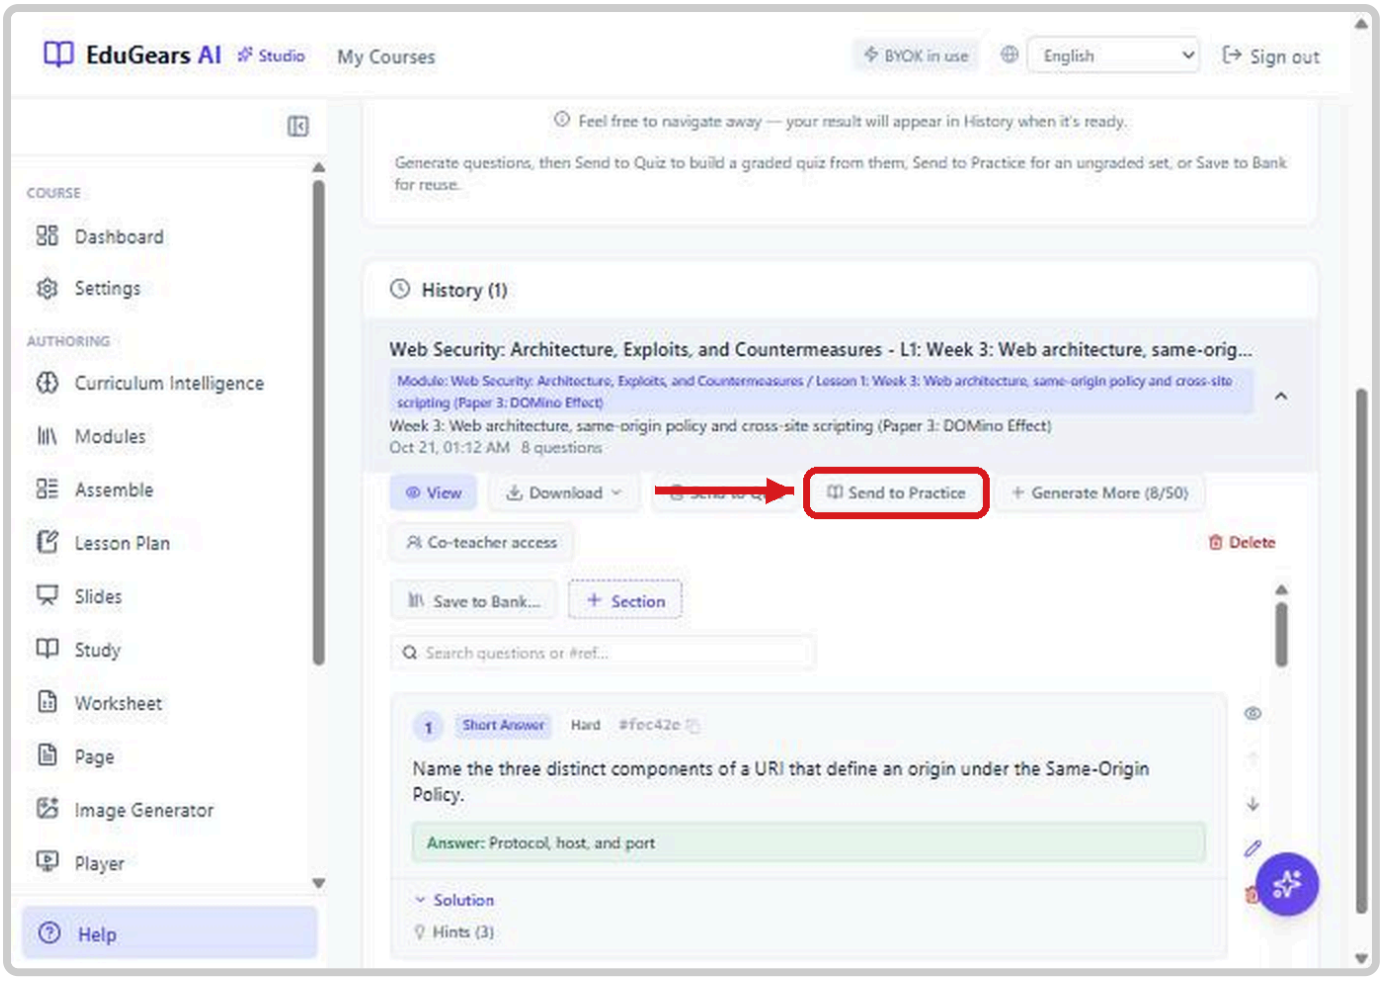

☐ Done? Tick the box and turn the page.

13

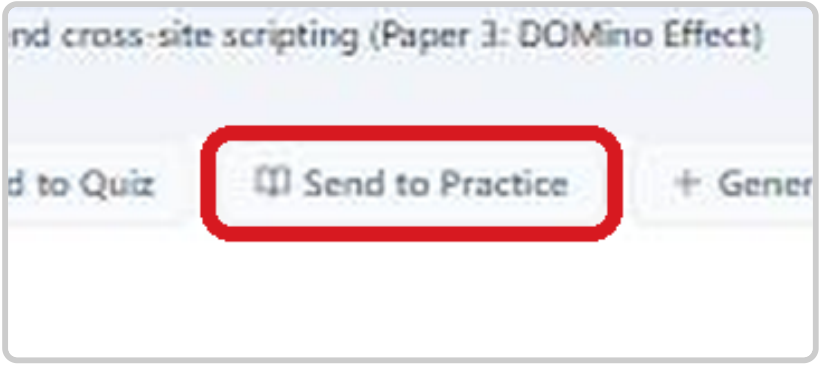

Step 13 of 17

Share the questions as practice

1. Click **Send to Practice**.

Look for this:

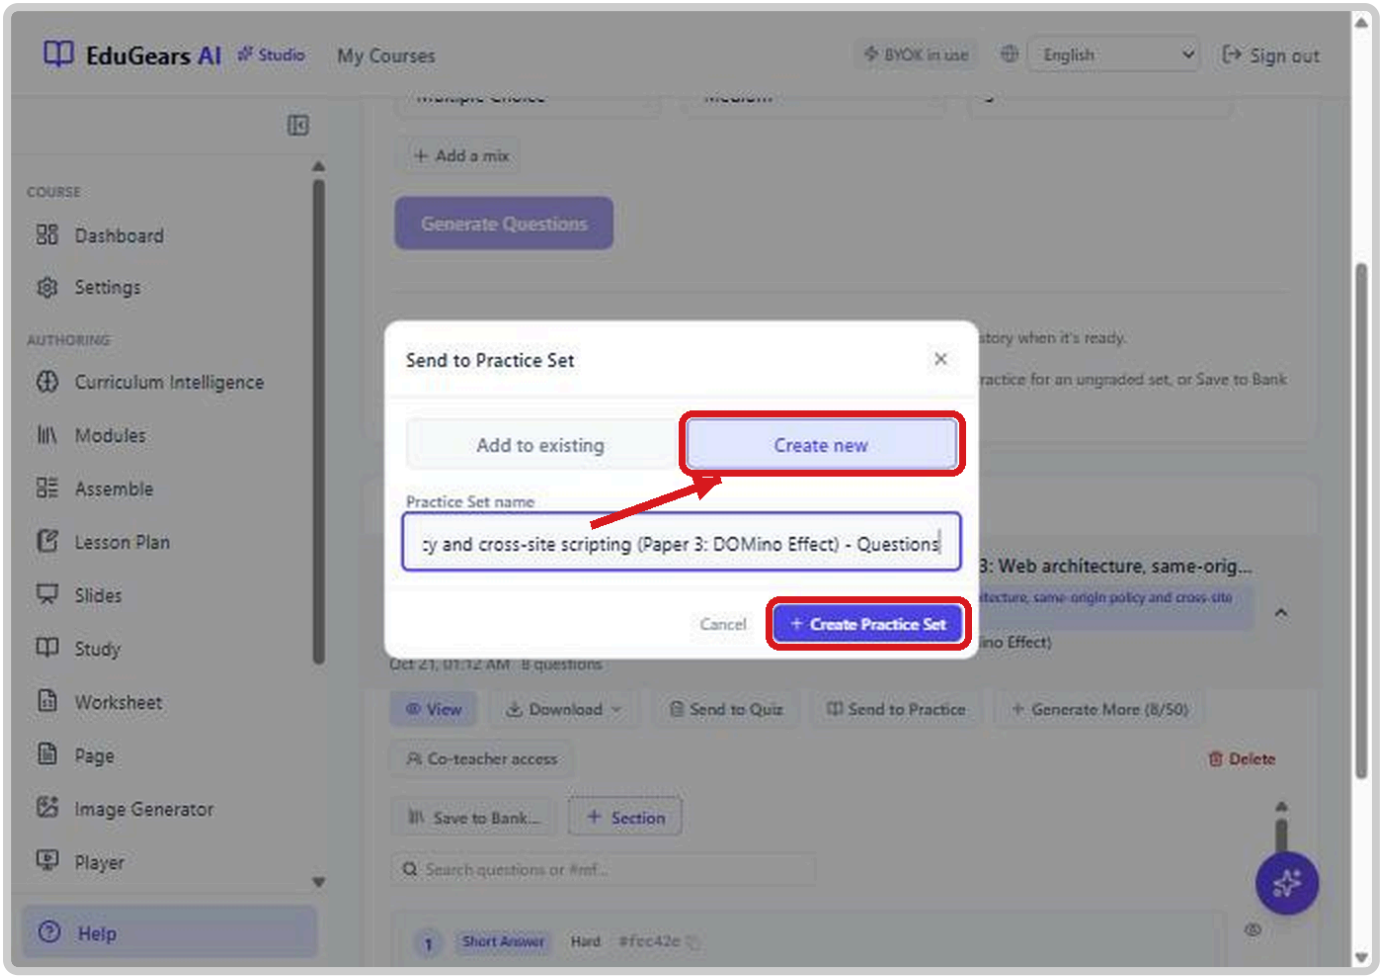

☐ Done? Tick the box and turn the page.

14

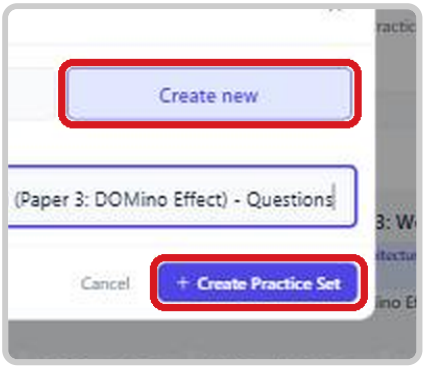

Step 14 of 17

Make a practice set

1. Click **Create new**.
2. Click **Create Practice Set**.

Look for this:

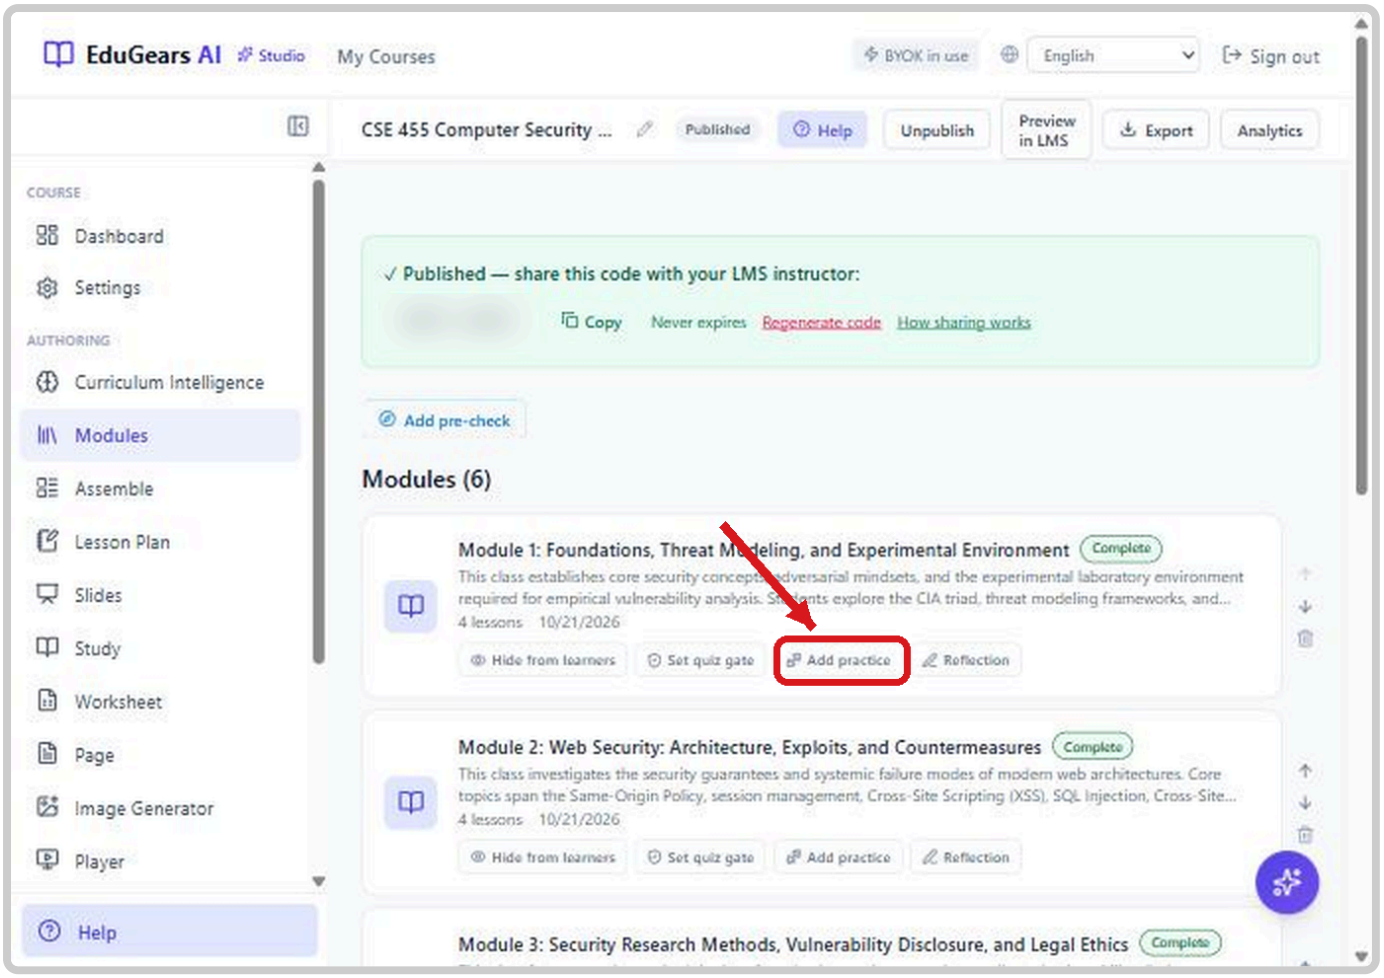

☐ Done? Tick the box and turn the page.

15

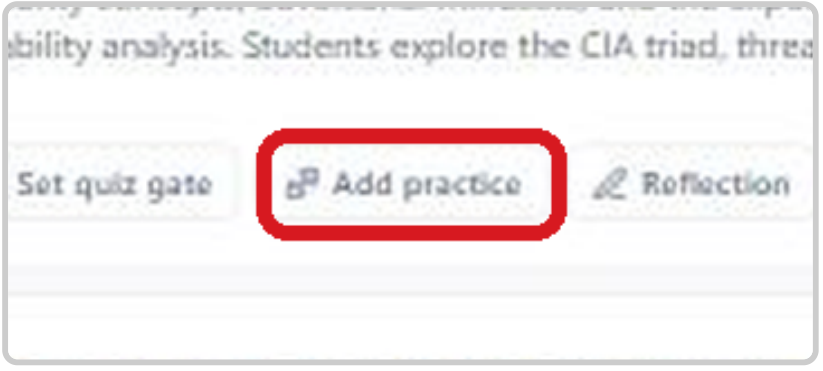

Step 15 of 17

Add the practice to the module

1. Click **Modules** on the left.
2. On your module, click **Add practice** and choose your practice set.

Look for this:

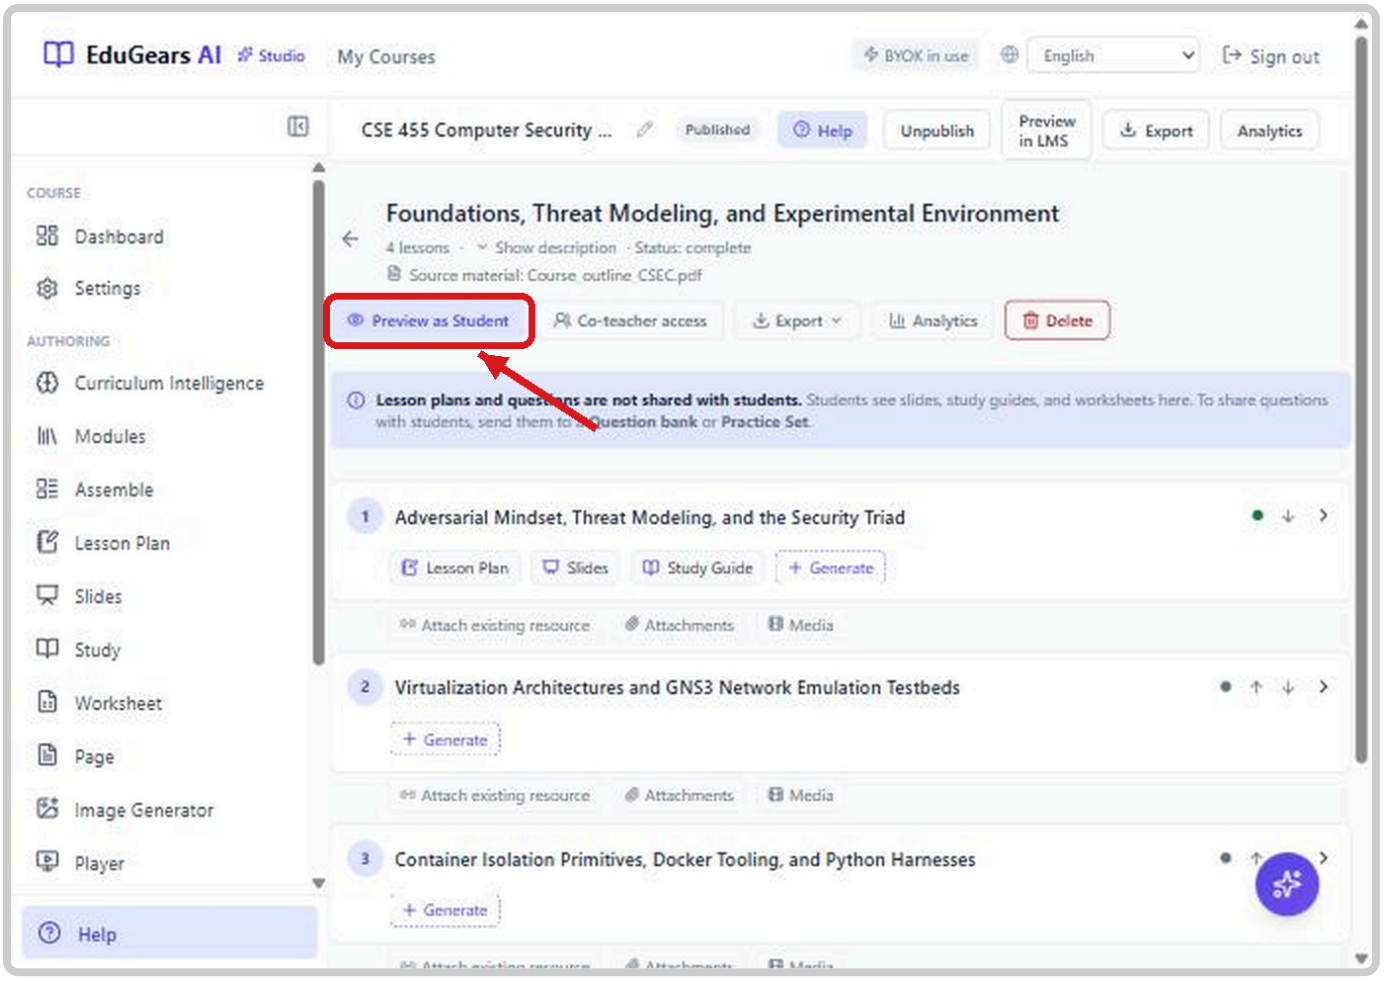

☐ Done? Tick the box and turn the page.

16

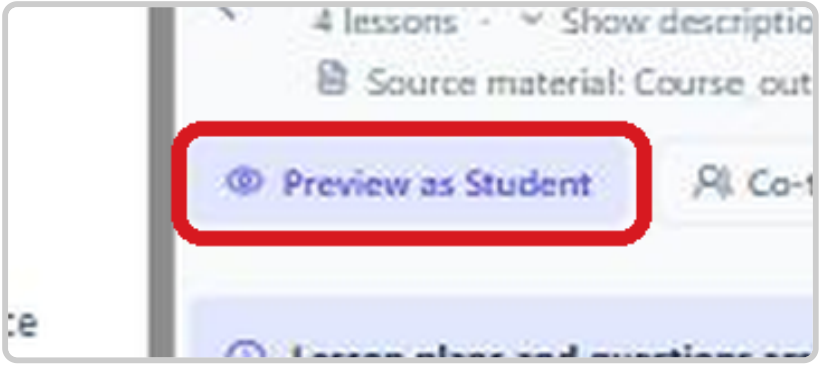

Step 16 of 17

See what students will see

1. Open the module and click **Preview as Student**.

Look for this:

☐ Done? Tick the box and turn the page.

17

Step 17 of 17

Put it in Sakai

1. **Slides:** in Sakai, click **Resources**, then **Add**, then **Upload Files**. Choose the PPTX file.
2. **Questions:** type them into **Tests & Quizzes**.

> Later, when CICT connects EduGears to Sakai, you will only need to paste your course's **share code** into Sakai. Keep that code private, like a password.

> **Tip:** If your browser offers to fill in a password on a Sakai "External Tool" form, cancel and ask CICT.

☐ Done? Tick the box and turn the page.

If you get stuck

- **A box is in the way:** click the × in its corner, or press the **Esc** key.
- **Nothing happens:** wait 10 seconds. Some steps are slow.
- **The page looks wrong:** press the **F5** key to reload it.
- **You are asked to sign in again:** sign in, then go back to the step you were on.
- **You cannot find a button:** look for the same words somewhere else on the screen. Websites change their layout from time to time.
- **Still stuck:** write down the step number and ask the workshop trainer or a colleague.

Keep safe

- Never upload student names, ID numbers, marks or unreleased exams.
- Upload only material you would be happy for anyone to read.
